### 2. CITATIONS AND EXPLANATIONS

Claims 1-40 meet the criteria set out in PCT Article 33(2)-(4), because the prior art does not teach or fairly suggest the base station directly receiving all uplink signals and the remote emitter processing at least one downlink signal from the base station.

**INTERNATIONAL PRELIMINARY EXAMINATION REPORT**

International application No.

PCT/US01/45663

**VIII. Certain observations on the international application**

The following observations on the clarity of the claims, description, and drawings or on the questions whether the claims are fully supported by the description, are made:

Claims 20 and 31 are objected to under PCT Rule 66.2(a)(v) as lacking clarity under PCT Article 6 because claims 20 and 31 are indefinite for the following reason(s): In claim 20, line 8, "the base station" lacks a proper antecedent basis since there are two types of base stations in lines 3 and 5. In claim 20, line 18, "the base station" lacks a proper antecedent basis because of the two types of base stations. In claim 31, line 4, "the user" is ambiguous since line 3 specifies "a first user".
